

## " Zero Budget Politics Initiator " & "Social Media Awareness" Campaigner

I am P. Madhava Reddy, 47 Years Old , Born and brought up in Rural India , graduated from NIT Warangal ,

I am keen observer of the Society at Gross root Level as I hailed from Middle Class back ground from one of the faction driven village of Rayalaseema , I had opportunity to see lot of ups and downs in my Life Personal, professional Life but those are not deter me to lead my Life happily and help fellow citizens which ever way I can .

While Leading the Life Happily I had seen lot of people, not only troubling them self but they are troubling their family in turn society and nation due to lack of Understanding about their life while carrying different activities right from Education to Employment . We are working with Educational institutes to inculcate moral values in Education

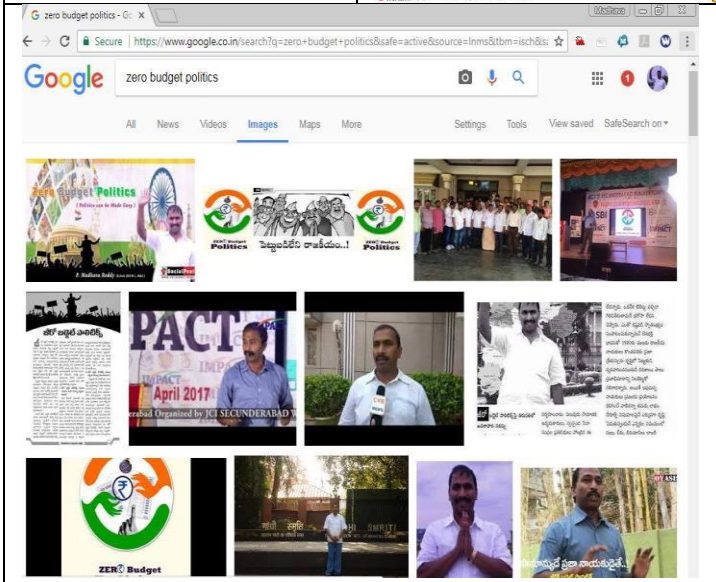

There is no problem, A person who spends 5-10 cr in elections is defeated , For suppose any reason the same person who spends 5-10 Cr in elections wins ? then there is big problem for the public / area from where that idiot got elected, it is happening decades together..! , **Zero Budget Politics** is one of the best Solutions to send such persons out of politics other wise our future is bleak..!

**Social Media** is buz word and order of the Day as every using and spending their time day in & day out with this they are living themselves aloof , proper understanding only save themselves as well as their families other wise it leads devastating results at personal / family and society front if it is not used in with out understanding..!
